SURVEILLANCE INCIDENT REPORTING SYSTEM

CASINO & HOTEL | PALACE HOTEL | ARTISAN HOTEL

Beta Release Version

System: Jin Bei Surveillance Incident Reporting System (SIRS)
Version: Beta 2.0
Target Release Date: 28.04.2020

Objective:

i. Stored operations Daily Log Entry.
ii. Stored operations Incident Reports.
iii. Provide staff details and photo verification.
iv. Generates spreadsheet and form reports base in queries.
v. Search specific reports in daily log and incident report.

System Updates:

I. **Access Level –** access to system are based on the Access Level
   1. **Access Level 1 –** Super User
   2. **Access Level 2 –** Managers
   3. **Access Level 3 –** Supervisors
   4. **Access Level 4 –** Operators and Sr. Operators

II. **Log-In**
   - *Staff were able to change their password as long as it will pass system verification.*

III. **Log-Off**
   - *System will auto log-off on the specified time to reduce system load and cut-off idle access in the system.*

IV. **Title, Location and Department**
   - Title and Location are categorized by Department.

V. **Report Status**
   a) **Pending:** all reports are created in "Pending" status by default
      - Can be edit/update by all team members
   b) **Open:** Once report is in this status meaning pending report already edited/updated by Supervisors or above
      - Supervisor check all pending status and once done change the status to Open
   c) **Closed:** Once report is in this status meaning already check by Managers and/or above
      - Managers will check all open reports and change status to "Closed" once done.
      - Reports under this status cannot be edited/updated by Level 3 & 4.
      - Manager and/or above can change Report status to from "Closed" to "Open or Pending"

   Basic Flow: **Pending** (Operator & Sr. Operator) >>> **Open** (Supervisor) >>> **Closed** (Manager)

VI. **Main Page**
   - DL & IR are categorized base on Report Status: Pending, Open, Closed
   - Main Page displays counts of reports per status
   - Can Select which status you want to display or click "Home" button or un-checked all status box to display all
   - *Main Page windows views in full screen mode.*
   - *Search specific records base on Search keyword for both daily logs and incidents report.*
   - *Can filter Date in the date column ex. Today, Yesterday, In-Between dates, last week, this week etc.*

VII. **Daily Log**
   - Name of the staff who call will be displayed after selection of staff id in "Call By" area for name verification.

- *Can verify staff photo and other details in the "Check staff" button, no need to browse folders or excel records.*

VIII. Incident Log

- Adjusted the form layout manually to fit Console but not auto fit, some Console might still encounter same problem.
- **By default, All Form Layout is fit for Display Mode: 1920 x 1080 (32 bit) (60Hz)**
- *Adding staffs/participants in the incident made easy.*
- *Can attached necessary file on the specific incident report, like Hand to Hand template for BAS report.*
- *Can link the incident report to subject/patron profile for reference.*
- *Prompt the user to input ID in the verified by and closed by section of the report.*
- *Can directly print a PDF copy of the form layout of the current incident record if needed.*

IX. Incident and Daily Log

- *Displays Gaming Date, Created Time and Work Week details*

X. Photo

- Can now upload photos for Staff and Subject/Punter, see instruction area.
