PROFESSIONAL SUMMARY

Results-driven Casino & Hospitality Operations Manager with over 12 years of cross-functional leadership in surveillance, asset protection, and technical systems optimization. Combines an advanced Computer Science/IT background with deep domain expertise across Casino Operations (Gaming, VIP Salons, Slots, Cage, Security). Proficient in architecting custom software solutions (including the 6-year running Surveillance Incident Reporting System - SIRS and the modern web-based D' Cagas SIRS Pro suite), real-time statistical intelligence tools, and standardized operational templates that eliminate manual inefficiencies, detect advantage play, and safeguard multi-million-dollar assets.

CORE COMPETENCIES & TECHNICAL SYSTEMS

- **Surveillance & Management Systems:** Avigilon, iTrak, Synectics, Dallmeier, Pelco, Endura, IGT Patron Management, Table Manager, CMS (Casino Management System).
- **Technical Development & Web Scripting:** Full-Stack Web Development (HTML5, CSS3, Modular JavaScript ES6), MS Access (VBA), Advanced MS Excel Modeling, Canvas API Rendering, Workflow Automation (Zapier/Webhooks).
- **Advantage Play & Risk Mitigation:** Multi-Deck Card Depletion & AP Counting (Dragon 7, Panda 8, Pairs), Theoretical Hold vs. Variance (Z-Score) Modeling, Pre-Commit Table Liability Analysis.
- **Leadership & Compliance:** Standard Operating Procedures (SOPs) Development, KPI Architecture, Asset Protection, Loss Prevention, Multicultural Team Leadership, Incident Investigation.

FEATURED TECHNICAL PROJECT HIGHLIGHT

Surveillance Incident Reporting System (SIRS) — 6-Year Operational Backbone

- Architected and maintained the foundational, property-wide MS Access database engine running continuously for 6 years to securely log, archive, and track security and surveillance incidents.
- Engineered automated data export pipelines feeding structured shift records into executive management reports and loss mitigation audits.

D' Cagas SIRS (SIRS Pro) — Web-Based Surveillance Intelligence Suite

Bespoke Web-Based Surveillance Intelligence & Table Protection Engine

- Real-Time Advantage Play (AP) Radar: Engineered an automated 8-deck card depletion engine tracking live tray counts to compute True Counts and risk thresholds for Dragon 7, Panda 8, and Side Bets.
- Pre-Commit Table Liability & 7-Seat VIP Dock: Built risk calculation engines monitoring net Banker/Player exposure and chip ledgers across seats 6–12 in real time.
- Dual Mid-Round Insurance & Canvas Roads: Coded dynamic Baccarat insurance stage monitoring and HTML5 Canvas engines for Big Road, Bead Plate, and Ask Road prediction matrices.
- Derived Road Canvas Rendering & Numpad Hotkeys: Developed real-time HTML5 Canvas engines for Big Road, Bead Plate, Big Eye Boy, Small Road, and Cockroach Pig with Ask Road prediction matrices, operated completely via a zero-mouse numpad hotkey matrix.
- Audit Vault & Master Shift Dossiers: Created browser-stored encrypted shoe archives (.sirs/.json), in-place round amendment modals, and automated Master Shift Dossier generation with PDF/Excel export capabilities.

PROFESSIONAL EXPERIENCE

Palace Hotel (PPTSP Investment) — Sihanoukville, Cambodia
Manager – Surveillance | July 2022 – Present
Special Project Manager | March 2019 – July 2022

- Direct daily casino-wide resort operations, managing staff performance, shift rosters, and cross-departmental incident resolutions.
- Maintain and evolve the 6-year running Surveillance Incident Reporting System (SIRS) database while deploying the modern web-based D' Cagas SIRS Pro suite.
- Author and deliver core corporate operations intelligence, including Patron Analysis, Investigations, Executive Briefs, and House Loss Reports.
- Design and deploy property-wide operational tracking systems, KPI architectures, and formal Record of Discussion (ROD) compliance frameworks.

Imperial Pacific International (Best Sunshine International) — Saipan, MP, Northern Mariana Islands
Surveillance Officer – Special Projects | October 2015 – February 2019

- Appointed to specialized Surveillance Analyst Team tracking major patron wins, VIP trends, and table game win/loss margins.
- Administered property-wide iTrak Surveillance system and engineered operational tools including automated Slots Hot Keys, Employee Search systems, and Live Forex Conversion engines.

Resorts World Manila — Pasay City, Philippines
Surveillance Operator / Investigation Team | February 2012 – September 2015
Acting Surveillance Executive / Supervisor | June 2014 – July 2014

- Protected multi-million-dollar property assets through real-time live monitoring and complex historic video audit investigations.
- Coded property's digital ecosystem transition, developing the "RWM eDL" (Electronic Daily Log) using MS Access VBA to completely eliminate manual paper log frameworks.
- Awarded "Hawk of the Week" (Fiscal 02, 2015) for excellence in asset threat detection and risk mitigation.

Cypress Manufacturing Ltd. (CML) — Cavite, Philippines
Application Support Engineer / IT Developer | September 2008 – November 2011

- Provided Level 1 to Level 3 data infrastructure support, backend planning reports monitoring, and Warehouse Management System (WMS) engineering.

AMA Computer College — Cavite, Philippines
Instructor 1 (Computer Science) | 2007 – 2010

- Educated college freshmen in core IT subjects, advised student organizations, and led large-scale campus activity planning.

OPERATIONAL TEMPLATES & TABLE AUDIT SYSTEMS

- **Niu Niu & Power 5 Audit Frameworks (NIU NIU H2H, Power 5 Master Templates**): Designed multi-tier table game evaluation matrices and hand verification checklists for Asian card game mechanics (Bull-Bull/Niu Niu) and side bets.
- **Non-Commission Baccarat & Hand-to-Hand Models (NCB w INS, D7-P8_MB, BST, BJ Templates):** Engineered master Excel operational templates incorporating single/multiple hand-to-hand layouts, side bets, natural/commission calculations, and insurance tracking matrices.

- **Electronic Daily Logs (RWM eDL) & Losing Shoe Checklists:** Coded MS Access/VBA digital logging mechanisms replacing manual paper logs, supplemented by multi-sheet shoe audit protocols (Losing Shoe Checklist, Card Verification).

EDUCATIONAL BACKGROUND

Post-Graduate Coursework:
Master's Degree Units in Computer Science/IT (27 Units Completed) | AMA Computer University
Bachelor's Degree:
Bachelor of Science in Computer Science / Information Technology | AMA Computer University
